RE: Stimulan European Approval

EC Certificate Number LRQ 0960727/B.

The Biocomposites' product Stimulan was first certified to the Medical Devices Directive (93/42/EEC as amended) in October 1998.

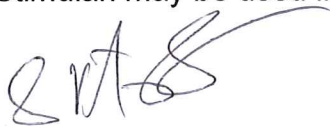

Stimulan is available as a kit, which contains calcium sulphate powder and a mixing solution which, when combined, enables the material to set. A faster setting version (Rapid Cure) is also available.

Indications for Use:

To fill a bone void or defect created by

- Surgery
- A cyst
- A tumour
- Osteomyelitis or other traumatic injury

Stimulan may be used in combination with antibiotic and used at an infected site.
