**Biocomposites Status on Novel Coronavirus (COVID-19)**

The recent events and rise of the COVID-19 virus on a global scale have brought challenges to us in ways that were unimaginable at the beginning of the year. We have been following the guidance published by the governments in the countries that we operate in to keep our employees safe, whilst ensuring that we continue to manufacture our lifesaving products.

Our warehouses are stocked - including our newly opened facilities in the US and UK - and we have every confidence that we can continue to meet the needs of our distributors, hospital partners and their surgeons.

We are executing new site access guidelines to restrict visitors to our facilities and conducting a staff capability review across all functions to ensure we have cover in business-critical processes.

As always, we remain focused on supporting the wellbeing and safety of our staff and delivering our excellent products to patients and hospitals worldwide.

Thank you and best wishes through this period.
