

## To whom it may concern:

There are no specific CPT codes for the application of synthetic bone void fillers. Payment for bone void fillers are considered to be bundled in conjunction with a procedure. If it is necessary to report a HCPCS code for the use of a bone void filler in conjunction with a procedure, then C1713 is the appropriate code.

William E. Connelly

Disclaimer: The coding and reimbursement information provided above by Biocomposites Inc. was obtained from third party sources and is subject to change without notice, including as a result in changes in reimbursement laws, regulations, rules and policies. All reimbursement information is presented for informational purposes only, is general in nature, and does not cover all situations or all payers' rules or policies.

It is the provider's responsibility to report the codes that accurately describe the products and services furnished to individual patients. Laws and regulations regarding reimbursement change frequently and providers are solely responsible for all decisions related to coding and billing including determining, if and under what circumstances it is appropriate to seek reimbursement for products and services. Providers should report the procedure and related codes that most accurately describe the patients' medical condition, procedures performed, and the products used. For these reasons, providers are advised to contact Medicare and/or specific payers if they have any questions regarding billing, coverage and payment. Likewise, providers should contact a medical specialty society or the American Medical Association for coding clarification. Providers should check the complete and current HCPCS and/or CPT manual to see and consider all possible HCPCS and/or CPT codes. Biocomposites Inc. makes no representation or warranty regarding this information or its completeness or accuracy and specifically disclaims liability or responsibility for the results or consequences of the use of this information. CPT codes and descriptors are copyrighted by the American Medical Association.
